Job Roles For C|CT-Certified Professionals

IT networking specialist	Network administrator
Cybersecurity technician	Network engineer
IT manager	Security operations center (SOC) analyst

About C|CT

The C|CT is an entry-level cybersecurity program engineered by EC-Council, the creator of the Certified Ethical Hacker (C|EH) certification, to address the global need and demand for cybersecurity technicians with strong foundational skills.

It provides the foundational skills essential for starting a career in cybersecurity, focusing on four disciplines: network defense, ethical hacking, digital forensics, and security operations.

This certification immerses students in well-constructed knowledge transfer.

Course Outline

Module 01	Information Security Threats and Vulnerabilities	Module 12	Mobile Device Security
Module 02	Information Security Attacks	Module 13	IoT and OT Security
Module 03	Network Security Fundamentals	Module 14	Cryptography
